DioVISTA Webinar 2020

~How to use the flood simulator~

Simulation results of large-scale flood damage (example of operation screen of DioVISTA/Flood)

Re

Wednesday, July 29, 2020 10:00 – 16:30

substance

6 courses in each field (30 minutes each)

Construction Consulting, Dams, Non-life Insurance, Disaster Prevention Administration, Corporate Disaster Prevention, English

Location

Online

* After applying for participation, the secretariat will inform you by e-mail how to watch by the event date.

Participation fee

Free/ Pre-registration required

Greeting

Dear Sirs, I would like to express my sincere congratulations on your continued success.

On July 29, we will hold an online seminar for professionals involved in flood damage and those who are considering BCP for flood countermeasures. We would appreciate it if you could feel free to apply.

As you know, severe flood damage occurs almost every year. Following the torrential rains Japan the west in 2018 and the typhoons Japan the east in 2019, the need for flood countermeasures has been recognized nationwide.

We have been selling the flood simulation software DioVISTA/Flood since 2006 and have been used by many customers, mainly in the non-life insurance and construction consulting fields. In addition, we provide detailed and specific BCP formulation support based on simulations for the corporate disaster prevention field, and have been well received by companies in the manufacturing industry, food, broadcasting, and social infrastructure.

In this seminar, we will introduce the features of the flood simulator DioVISTA/Flood and how to use it. In order for many people to participate, this year's seminar was held online.

We understand that you are busy, but we sincerely look forward to your participation.

Kind regards

request

Prior to the seminar, you will gain a better understanding of DioVISTA by using the DioVISTA/Flood free version to get a feel for the operation.

course

Date: Wednesday, July 29, 2020

We have prepared courses 1~6 for each field.

time	substance
10:00 ~ 10:30	Course 1: Leveraging DioVISTA in the field of construction consultancy We will introduce DioVISTA, which is used by many companies in the construction consulting field, and how to use it for creating flood estimation maps and flood prediction area maps.
11:00 ~ 11:30	Course 2: Utilizing the Dam Dashboard in the Dam Field We will introduce Dam Dashboard, a dam operation support tool that realizes AI-based inflow prediction and discharge optimization, and how to use it for dam management and operation support.
13:00 ~ 13:30	Course 3: Utilizing DioVISTA in Property and Casualty Insurance We will introduce examples of proposals for quantifying flood disaster risk over a wide area and reducing damage to target properties using DioVISTA, which is widely used by non-life insurance companies.
14:00 ~ 14:30	Course 4: Utilization of DioVISTA in Disaster Prevention Administration We will introduce real-time prediction technology for river water levels and inundation areas using rainfall forecasting, and services that can be used to share a sense of the danger of flood damage and as a guideline for initial response.
15:00 ~ 15:30	Course 5: Proposal of BCP support for flood countermeasures for corporate disaster prevention In order to become a company that can withstand flood damage, we will introduce a BCP support service for flood countermeasures that supports the formulation of BCPs based on detailed simulations and the bridge with the government.
16:00 ~ 16:30	Course 6: DioVISTA Flood Simulator – technology & use case DioVISTA technology and use case will be introduced. Our live demo will show its 3-D visualization, fast calculation, and intuitive operation.

How to apply

Please contact us by email or phone by July 22. Inquiries and applications

Mail: diovista@pis.hitachi.co.jp

Tel: Sales: 03-5577-8193 (Contact: Nakano)Contact:

- Name of the person who would like to participate
- Affiliation and position
- Email address

* Participation Course (You can choose one or more courses) Course 1 (Construction Consulting) Course 2 (Dam) Course 4 (Disaster Prevention Administration)

Course 3 (Non-life Insurance)Course 5 (Corporate Disaster Prevention)Course 6 (English)

* If the capacity is reached, the application will be closed.
